Because **we have our own In-ear monitoring system** that is located in a rack near the drum set, we need a **deduction of the things listed 1-8 on the stage plan.**

We have our own multicore for that, so we only need the opportunity to get the deduction of those channels.

The things listed from 9-16 you will get from us via a multicore.

There will be **no more DI's needed**, because that's already done in our rack.

If you have any questions, feel free to contact us!
